

Surgical glove

AF micro fit

Suppressed allergens so far to protect "hands".
The feeling is "Like a Second Skin". More Sensitive!

Realized softer tactile sensitivity compared to conventional polychloroprene surgical gloves.

(Compared to our company products)

AF microfit is a new synthetic rubber surgical gloves that do not contain casein, powder and natural rubber latex as well as accelerators.

* Feature of polychloroprene surgical gloves is more stable durability compared to conventional surgical gloves (made of natural rubber latex and polyisoprene synthetic rubber).

Accelerator Free

"Accelerators" is said to occupy 80%* of allergic contact dermatitis caused by gloves. Also be careful with synthetic rubber gloves, as some products contain accelerators.
